

Curtain runners

Article consisting of a molded body on which bearings are mounted to build the wheels. The bearings are made of carbonitrided and galvanized iron or acetal resin respectively for aluminium or galvanized guides normally marketed. The axial clearance gives great smoothness and makes it ideal for use at high temperature.

APPLICATIONS:

- TRUCK CURTAINS
- SLIDING DROPSIDE PILLARS
- VARIOUS TYPES OF SLIDING SYSTEMS

KEY (the measurements are in mm): A = WHEEL DIAMETER; B = DISTANCE BETWEEN WHEELS; C = RUNNER HEIGHT; D= RUNNER WIDTH

IMAGE	CODE	DESCRIPTION	A	B	C	D
	CAR2R24STCOB	GALVANIZED SHORT PLATE 2 WHEELS Ø24 RUNNER	24	27	64	30
	CAR2RSLUb	GALVANIZED LONG PLATE 2 WHEELS Ø24 RUNNER	24	27	92	28
